

3 Courses

Introduction to Trading,
Machine Learning & GCP

Using Machine Learning in
Trading and Finance

Reinforcement Learning for
Trading Strategies

Aug 11, 2024

Konstantinos Mourogiannis

has successfully completed the online, non-credit Specialization

Machine Learning for Trading

The courses will teach you how to create various quantitative and algorithmic trading strategies using Python. By the end of the specialization, you will be able to create long-term trading strategies, short-term trading strategies, and hedging strategies.

Jack Farmer
Curriculum Director
New York Institute of
Finance

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
